

Telehealth

Kids & Teens Medical Group offers health care services seven days a week, including after-hours care and extended evening appointments through its Telehealth service.

PROVIDING CONVENIENCE

Remote Medical Consultations From Wherever Home Is

Through its Telehealth Service, the Kids & Teens Medical Group provides access to its pediatricians from the comfort of one's couch.

*Another reason why KTMG is the No. 1
Pediatric Medical Group in Los Angeles*

Telehealth visits enable the patient to connect with a board-certified pediatrician remotely through a secure virtual platform, without needing to leave home.

Pediatricians can evaluate concerns, offer medical advice, and provide treatment recommendations with the same care and attention as an in-person visit. It's a flexible option for busy families or when getting to a clinic is not always possible.
